

Yahia Osama Yahia

SOC Analyst · Cybersecurity Engineer

☎ 01016837002 ✉ yehia.osam@gmail.com 📍 Cairo, Egypt 🔗 linkedin.com/yahia-osama 🐙 /UphillPush

SUMMARY

Cisco CyberOps Associate with hands-on defensive security experience across government IT infrastructure, SOC simulation, and active threat investigation. Proven in real-world security administration at the Egyptian Police Forces and currently delivering cybersecurity instruction. Skilled in SIEM triage (Splunk, ELK), phishing forensics, malware analysis, network traffic investigation with Wireshark, and MITRE ATT&CK mapping. Strong Linux/Windows administration and CCNA-level networking foundation.

TECHNICAL SKILLS

SOC & Detection: SIEM (Splunk, ELK/Elastic Stack), Alert Triage, Log Analysis, Incident Investigation, Threat Detection, IOC/TTP Documentation, MITRE ATT&CK

Forensics: Phishing Forensics, Email Header Analysis, Kill Chain Reconstruction, Malware Behavior Analysis, Wireshark Packet Capture & Analysis, C2 Beacons

Networking: TCP/IP, OSI Model, CCNA Routing & Switching, Network Diagnostics

Systems: Linux CLI, Windows Security, Bash Scripting, User Access Management, Active Directory basics

Programming: Python (Pandas, NumPy, ML pipelines), SQL, MongoDB, Bash, C, Git

Documentation and WriteUp: Structured incident write-ups, security policy documentation, audit evidence collection — English C1 written communication

EXPERIENCE

Cybersecurity Instructor (DECI Initiative) – Part-time | iSchool

Mar 2026 – Present

- Deliver comprehensive cybersecurity instruction, translating security concepts into accessible technical curriculum.
- Reinforce knowledge in network defense, threat actors, and security principles through hands-on technical guidance.

IT & Security Administrator | Soldiers Affairs Office, Egyptian Police Forces — Cairo

Apr 2025 – Mar 2026

- Secured IT networks and endpoint devices, ensuring continuous system availability and strict Operational Security.
- Administered restricted databases with tight access controls; awarded the Qudwa Hasana for exemplary performance

Python & AI Intern (64 hrs) | Public Authority for Educational Buildings — Nasr City, Cairo

Jul – Aug 2023

- Built Python data pipelines (Pandas, NumPy) for automation and reporting. Developed AI optimization model for building systems.

PROJECTS & WRITE UPS

Phishing Forensics & Email Threat Analysis

- Conducted multiple end-to-end phishing investigations: analyzed email headers, identified spoofed senders, traced adversary infrastructure, retrieved live phishing kits, and extracted malicious URLs.
- Mapped adversary delivery techniques and findings to MITRE ATT&CK phishing sub-techniques. Documented IOCs, TTPs, and recommendations in structured analyst write-ups.

Boogeyman Series — Progressive Threat Actor Investigations (1, 2 & 3)

- Investigated an escalating series of advanced threat group compromises covering the full attack chain: phishing triage, endpoint log analysis (Windows Event Logs, PowerShell), and network traffic investigation with Wireshark.
- Identified C2 beacons, lateral movement TTPs, persistence mechanisms, and data exfiltration indicators across all 3 scenarios. Findings documented as professional incident reports with IOC tables and MITRE ATT&CK.

Shadow Trace — Malware & Threat Actor Tracing

- Investigated a suspicious file to uncover a hidden infection chain through static and behavioral analysis, source tracing, and attribution indicators.
- Applied CTI tooling to map threat actor infrastructure and document investigation methodology and conclusions

COURSES & TRAININGS

- Cisco CyberOps Associate — Cisco
- CCNA Training — Cisco Networking Academy
- Google Cybersecurity Professional — Coursera

- TryHackMe SOC Level 1
- Mobile Communications — NTI
- Embedded C Programming — NTI (2023)

EDUCATION

B.Sc. Electronics and Communications Engineering

(Full Scholarship) – October 6 University Sep 2019 – Jul 2024

- CGPA(3.25), Graduation Project: Reconfigurable Intelligent Surface (RIS) – Fully Funded by ITIDA

Achievements & Activities

- President, Innovation Club — 300+ students,
- IEEE CUSB — 10 + workshops
- TIEC Ambassador — 500+ professionals engaged
